SIKORSKY AIRCRAFT

MODELS: Sikorsky (Army) R-4B Helicopter (Approved 2/28/47)

SPECIFICATION NUMBER: L-7-2

(Eligible for Certification in Limited Category only.)

(Holder of Limited Type Certificate, Douglas W. Holmes, Compton, CA)

Engine Warner R-550-1 or -3

Fuel 73 minimum octane aviation gasoline Engine limits Maximum rpm 2250; minimum rpm 1870

Rotor limits (Power off) Maximum rpm 265; minimum rpm 170

Airspeed limits Never exceed 70 mph

Maximum weight 2700 lbs.

C.G. range 3.9 inches forward to 3.03 inches aft of the rotor

center line

Other operating

limitations Army T.O. AN-230HA-1

Certification basis Limited Type Certificate No. 7 (CAR 9 effective

11-21/46)

Production basis None may be produced under this approval

Export eligibility Not eligible for a Certificate of Airworthiness for

export

Equipment:

No equipment other than engines and propellers are specified. However, such equipment as required by Civil Air Pegulations Part 43.30 for the particular operation authorized for NC aircraft must be installed. Also, any additional equipment necessary for the proper operation of the aircraft.

In addition, the aircraft may incorporate such military equipment (except armament) as was originally incorporated in the type for military or naval service. Additional equipment may be installed as can be substantiated on the basis that it presents no obvious hazard to safety.

- NOTE 1. Weight and Balance Report including list of equipment included in the certificated empty weight must be submitted for each aircraft. Army or Navy weight records in current condition may be submitted in lieu of an actual weight. The equipment list need include no more than the following:
 - (a) Required equipment as defined under "Equipment" above.
 - (b) Additional items as may be reasonably considered removable and are so located or of such weight that their removal or addition could noticeably affect the weight and balance of the aircraft. Items built into the aircraft structure need not be listed. The equipment list must be prepared by the applicant for the approval of the certificating C.A.A. representative, and in such form that it can be attached to the C.A.A. Operation Limitations.
- NOTE 2. The following placards must be prominently displayed in the positions indicated:
 - (a) In the cockpit in full view of the pilot:
 "All acrobatic maneuvers prohibited."
 "Night and instrument flight prohibited."
 "Do not apply rudder abruptly during flight."
 "Do not engage in maneuvers which require large and/or rapid lateral motions or reversals of the cyclical pitch control."
 - (b) In full view of passengers: "This is a military type aircraft and under the Civil Air Fegulations shall not be used for the carriage of passengers or cargo for compensation or hire."

- NOTE 3. The following statement must appear on the Operation Limitations:

 "This airplane must be operated at all times within the limitations set forth in Army Technical Order No. AN-01-20HA-1 except for limitations specifically called out in Aircraft Specification AL-7 in which case the values given in the specification must be observed. A copy of the pertinent Army Technical Order and Aircraft Specification AL-7 must be carried during flight." In all cases it will be the responsibility of the applicant to secure copies of the Army Technical and Navy Service Change Order. The C.A.A. does not have these documents available for distribution.
- NOTE 4. All structural repairs should be made in accordance with Army Technical Order AN-01-230HA-3 also reference AN-01-230 HA-2 for maintenance. If any repairs or modifications (other than those covered in the pertinent Army or Navy repair manual) are made prior to and/or subsequent to NL certification, it is the responsibility of the owner to furnish sufficient evidence to a C.A.A. representative to show that the modified airplane maintains the same degree of airworthiness as the original. The C.A.A. can give no technical assistance on such matters since complete structural data for NI aircraft are not required by Part 9 and therefore are not available in the C.A.A.

No original NL airworthiness certificates may be issued after 8/31/48. The list of mandatory changes required prior to original certification may be obtained from CAA Aircraft Service, Washington, D.C. Attn: A-298.
